

# WHAT TO EXPECT ON MOVING DAY

Moving day can feel hectic. However, knowing what to expect can help everything go more smoothly. At Southeast Moving & Storage, our team works hard to keep your move organized, efficient, and stress-free.

Our movers may arrive early depending on your scheduled move time. We recommend having walkways clear and boxes packed before the crew arrives. If possible, reserve parking close to your home or business for easier loading access.

Once we arrive, we will review the moving plan with you, protect flooring and furniture when needed, and begin carefully loading your belongings. We wrap everything with protective moving blankets and shrink wrap for added protection during transport.

Please keep important documents, medications, valuables, chargers, and daily essentials with you during the move. We also recommend making arrangements for pets and young children to help keep everyone safe and comfortable throughout the process.

Once we arrive at the new location, our team will unload items into the proper rooms and help place furniture according to your instructions. Before leaving, we encourage customers to walk through the property to confirm everything has been completed properly.
